

CURRICULUM VITAE

Date Prepared: October 2019

Name: Nancy Rappaport, MD

Office Address: 256 Concord Avenue
Cambridge, MA 02138

Home Address: 6 Wyman Road
Cambridge, MA 02138

Work Phone: (617) 520-4752
Work E-Mail: nancy@nancyrappaport.com

Place of Birth: Boston, MA

Education:

1982 BA, English
Princeton University

1983 Postgraduate concentration, Science
Columbia University

1988 MD
Tufts University

Postdoctoral Training:

07/88-06/89 Intern in Pediatrics, Massachusetts General Hospital

07/89-06/92 Resident in Adult Psychiatry, Massachusetts General Hospital

07/92-06/95 Fellowship in Child and Adolescent Psychiatry, The Cambridge Hospital

Faculty Academic Appointments:

07/90-06/95 Clinical Fellow in Psychiatry, Harvard Medical School

07/96-11/01 Clinical Instructor in Psychiatry, Harvard Medical School

12/01-06/03 Instructor in Psychiatry, Harvard Medical School

07/03-05/12 Assistant Professor of Psychiatry, Harvard Medical School

06/12-06/16 Associate Professor of Psychiatry, Harvard Medical School

06/16- Associate Professor of Psychiatry, Part time, Harvard Medical School

Appointments at Hospitals/Affiliated Institutions:

12/95- Active Staff, Department of Psychiatry, Division of Child and Adolescent Psychiatry, Cambridge Health Alliance

Other Professional Positions:

1996-2003 Consultant to Cambridge Superintendent and Cambridge High School
2012- Member, Advisory Board, Dearborn Academy
2014-2015 Member, NAMI Mass School Mental Health Advisory
2016- Consultant to The Education Cooperative

Major Administrative Leadership Positions:

Local:

1996-2016 Mental Health Director, Teen Health Center, Cambridge Health Alliance
2000 Course Director, Special Education Symposium “Identification and Treatment of Asperger/Pervasive Developmental Disorder and OCD as it Pertains to the Classroom,” Cambridge Public Schools
2001-2016 Director of School-Based Programs, Department of Psychiatry, Division of Child and Adolescent Psychiatry, Cambridge Health Alliance
2004-2016 Course Director, “Frameworks for Understanding Child and Adolescent Development,” Department of Psychiatry, Cambridge Health Alliance
2004 Course Director, “Adolescent Self Destruction,” Harvard Medical School Continuing Medical Education Course
2004 Course Director, “The Meaning of Medication to Children and Adolescents,” Harvard Medical School CME Course
2005 Course Co-Director, “Being a Danger to Self or Others: The importance of assessing safety in children and adolescents in schools and in the community,” Harvard Medical School CME Course
2005 Course Co-Director, “Treating Posttraumatic Stress Disorders in Adolescents,” Harvard Medical School CME Course
2006-2007 Course Co-Director, “Treating Students K to 12: Clinicians and Educators Working Together,” Harvard Medical School CME Course
2008 Course Director, “Making Schools Safe: Understanding the Threat of Aggressive and Violent Behaviors,” Harvard Medical School CME Course
2009-2014 Course Co-Director, “Treating Students K to 12: Clinicians and Educators Working Together,” Harvard Medical School CME Course
2015- Course Co-Director, “School Mental Health: Treating Students K-12” Harvard Medical School CME Course
2016- Senior Consultant, Department of Psychiatry, Division of Child and Adolescent Psychiatry, Cambridge Health Alliance

Committee Service:

Local:

1998-2012 Member, Executive Committee of the Child Fellow Residency Training Committee, Cambridge Health Alliance
1999-2004 Member, Cambridge Hospital Faculty Committee on Strategic Plan for Child Psychiatry Residency Training
2001-2004 Chair, Cambridge Hospital Continuity of Care Committee
Cambridge Health Alliance
2004-2015 Member, Child Complex Care Review Committee, Cambridge Health Alliance

2011-2015 Member, Child Outpatient Leadership Team, Cambridge Health Alliance

Regional

2014- Member, Professional Advisory Council, Dearborn Academy

Professional Societies:

1995- American Academy of Child and Adolescent Psychiatry, Member
1997-2001 AACAP Work Group on Schools, Member
1997- Massachusetts Medical Society, Member
1998- Society for Research on Adolescence, Member
1998-2006 American Psychiatric Association, Member
2007- American Psychiatric Association, Distinguished Fellow

Editorial Activities:

Ad hoc Reviewer:

2006 Reviewer, Journal of Pediatrics
2007 Reviewer, Journal of Community Psychology
2009 Reviewer, Pediatrics
2011 Reviewer, Journal of Adolescent Psychiatry
2014 Reviewer, Adolescent Psychiatry
2015 Reviewer, Journal of Threat Assessment and Management
2016 Reviewer, Journal of School Violence
2016 Reviewer, Journal of the American Academy of Child and Adolescent Psychiatry
2017 Reviewer, Journal of the American Academy of Child and Adolescent Psychiatry

Honors and Prizes:

2006- Knowles Scholar, Harvard Freshman Seminar Program
2007- Distinguished Fellow, American Psychiatric Association
2008 Outstanding School-Based Health Center Supporter Award, Massachusetts Coalition of School-Based Health Centers
2011 Sidney Berman Award for the School-Based Study and Treatment of Learning Disorders and Mental Illness, American Academy of Child and Adolescent Psychiatry
2013 Art of Healing Award, Cambridge Health Alliance
2017 Exceptional Mentor Award, American Medical Women's Association

Report of Funded and Unfunded Projects

Funding Information:

Past Funding

1996-1997 PI, Orchard Foundation, Private foundation, \$15,000
Small Group Discussion Program Evaluation

The goal was to design an evaluation of high school advising program and provide a summary of the impact of the program to school committee, which showed efficacy of the program, allowed integration into the school's program, and gave results used to enhance the advising program.

- 1997-1998 Consultant, Children's Studies, Carnegie Foundation
Building Resiliency at Harvard: The Academic Advisory Program
My role was to provide consultation about community interventions that promote resiliency, to aid in analyzing how to provide the infrastructure that allowed for sustainability of interventions.
- 1997-1998 PI, Hirsh Family Foundation, Private foundation, \$100,000
A Model Advising Program Promoting Academic Success in High Schools
This grant was for development of an advising program (including: seeking to understand the gap in the literature of different pathways and trajectories of the advisor's role in shaping adolescent adjustment; developing appropriate interventions with adolescents to prevent psychopathology and foster resilience; professional development with teachers to strengthen positive relationships with students that promote educational success.) My role was to evaluate factors that strengthened positive relationships with students and staff in advising program.
- 1997-1998 PI, Roy A. Hunt Foundation, Private foundation, \$10,000
Evaluation of Advising Foundation Program
My role was to coordinate evaluation of advising program and to field test interventions in the high school that helped with adolescent academic engagement.
- 1997-1998 PI, William J. and Lia G. Poorvu Foundation, Private foundation, \$10,000
Advising Program Evaluation
My role was to design and analyze program evaluation.
- 2003-2007 Consultant, National Center on Minority Health and Health Disparities – P20MD000537
UPR/CHA Exploratory EXPORT Center: Bridging Communities
The mission of the UPR-CHA Exploratory Export Center is to generate and test interventions that can remedy service disparities in asthma and mental health for disadvantaged Latino and African Caribbean populations. I developed a pilot intervention with Cambridge public schools with the application of community based participatory research. My role was as liaison with educators and the Center for multicultural research to enhance assessment and delivery of services to immigrant students with challenging school behaviors.
- 2006-2008 Site PI (2006-2007), PI (2007-2008) NIDA/NIH 5K23DA018715-04 \$10,000/yr, \$20,000/yr
CBT Treatment for Post Traumatic Stress and Substance Use Disorders in Minority Youth
Site PI and then became PI for feasibility testing of a modified Cognitive Behavioral Therapy manual for minority youth. Goals include refining the

treatment manual and assessing the efficacy of a CBT intervention for PTSD with substance use disorder for multicultural youth and improving access with this evidence based treatment in school-based health clinics.

- 2006-2011 Site PI, Katz Foundation, Private foundation, \$100,000
Reducing Stigma Associated with Emotional and Learning Disorders
Funding from a family grant for a qualitative investigation of children's experience with emotional disorders with direct interviews with parents, teachers and developing group activities with participating children. For three years I provided expertise to the CCAD (Center for Child and Adolescent Development) and conducted the student groups for a year in the community-based non-clinical school setting; I have developed a school-based curriculum for students with severe emotional behavioral disorders.

Report of Local Teaching and Training

Teaching of Students in Courses:

Emerson College

- 2011 Writing Memoirs.
Graduate students.
One session, 2hr

Harvard College

- 2006-2017 Freshman Seminar: Frameworks for Understanding Psychological Development, Disorder and Treatment: Learning through Literature and Research
First year Harvard College students
Twelve sessions annually, 2hr each
- 2009 Surviving Suicide
Harvard Extension School students
One lecture, 2hr
- 2012 The Behavior Code: A Practical Guide to Understanding and Teaching the Most Challenging Students
Harvard Graduate School of Education
One lecture, 2hr
- 2019 Freshman Seminar: Frameworks for Understanding Psychological Development, Disorder and Treatment: Learning through Literature and Research
First year Harvard College students
Twelve sessions, 2hr each

Harvard Medical School

- 2005 ADHD and Depression
Harvard Medical School Integrated Clerkship students
One lecture, 1hr
- 2006 Personal Narrative and Professional Identity
Harvard Medical School Integrated Clerkship students
One lecture, 2hr
- 2006 Anatomy. Facilitator.
First-year medical students
One session, 3hr
- 2006 School Psychiatrist and Safety assessments
Harvard Medical School Psychiatry interest group, Boston
One session, 2hr
- 2008-2014 Patient-Doctor 1 (700 MJ). Small group leader.
Medical students.
One session annually, 3hr
- 2019- Medicine and Literature (PS745.6)
Harvard Medical School students
Eight sessions, 2 hrs each

Formal Teaching of Residents, Clinical Fellows, and Research Fellows (post-docs):

- 1997 Child and Adolescent Psychiatry in Urban High Schools: A primary prevention program
Harvard Consolidated Child Psychiatry
Single lecture.
Boston, MA
- 1999 School Based Interventions with Aggressive Urban Adolescents and Violence in Children, Adolescents and Families: Strategies for Prevention and Clinical Intervention.
Harvard Consolidated Child Psychiatry
Two lectures.
Boston, MA
- 2003- School Consultation Seminar
Child psychiatry first-year fellows
Cambridge Health Alliance
Six lectures annually, 2hr
- 2004-2015 Frameworks for Understanding Child and Adolescent Development
Adult psychiatry (PGY 3) residents
Cambridge Health Alliance

Co-director and four lectures annually, year-long course meeting weekly for 1.5hr

- 2007- Writing Your Passion: Clinical Writing
Clinical Scholarship class for child psychiatry fellows
Cambridge Health Alliance
One lecture annually, 2hr
- 2009 Latency and Adolescent Development
Harvard Consolidated Child Psychiatry.
Two lectures
Boston, MA
- 2010 “Latency” and “Adolescent Development”
Harvard Consolidated Child Psychiatry.
Two lectures
Boston, MA
- 2010 In Her Wake: A Child Psychiatrist Explores the Mystery of Her Mother’s Suicide
Advanced Behavioral Medicine Seminar for psychology and social work fellows
and interns
Cambridge Health Alliance
One lecture, 2hr
- 2011 “Schools and What Child Psychiatrists Need to Know” and “Adolescent
Development”
Harvard Consolidated Child Psychiatry.
Two lectures
Boston, MA
- 2012 “Safety Assessments and Approaches to Responding to Bullying in Schools” and
“The Behavior Code: A Practical Guide to Understanding and Teaching the Most
Challenging Students”
Harvard Consolidated Child Psychiatry.
Two lectures
Boston, MA
- 2013 School Consultation
Harvard Consolidated Child Psychiatry Fellows
Two lectures, 1hr each
- 2014 School Consultation
Harvard Consolidated Child Psychiatry Fellows
Two lectures, 1hr each
- 2014 Working with Self-Destructive Adolescents: How to Manage While Taking Care
of Yourself
Cambridge Health Alliance Adult Psychiatry Residents
One lecture, 1hr

- 2015 School Consultation
Harvard Consolidated Child Psychiatry Fellows
Two lectures, 1hr each
- 2016 Families Left Behind
Cambridge Health Alliance Adult Psychiatry Residents
One lecture, 1hr
- 2016 School Consultation
Cambridge Health Alliance Adult Psychiatry Residents
One lecture, 1hr
- 2017 School Consultation
Harvard Consolidated Child Psychiatry Fellows
Two lectures, 1hr each
- 2018 How to Navigate Inappropriate Sexual Behaviors at School
Cambridge Health Alliance Psychiatry Residents
One lecture, 1 hr
- 2018 The Behavior Code
Cambridge Health Alliance Psychiatry Residents
Two lectures, 1 hr each
- 2018 Depression and Suicide
Cambridge Health Alliance Psychiatry Residents
One lecture, 1 hr
- 2018 Suicide Assessment in Children and Adolescents
Cambridge Health Alliance Psychiatry Residents
One lecture, 1 hr
- 2018 School-Based Safety/Threat Assessment
Cambridge Health Alliance Psychiatry Residents
One lecture, 1 hr
- 2018 Sexualized Behavior of Children and Adolescents in Schools
Cambridge Health Alliance Psychiatry Residents
One lecture, 1 hr
- 2019 School Consultation/Working with Traumatized Children/Safety and Threat
Assessment in Schools
Harvard Consolidated Child Psychiatry Fellows
Two lectures, 1hr each

Clinical Supervisory and Training Responsibilities:

- 1996-2000 Supervisor of child psychiatry fellows during rotation (four fellows per year)
Cambridge Health Alliance, Teen Health Center
Four hours per week
- 1996-2000 Supervisor of chief resident
Cambridge Health Alliance, Teen Health Center
One hour per week
- 1999-2003 Supervisor of adult psychiatry resident (1 resident per year)
Cambridge Health Alliance, Teen Health Center
One hour per week
- 2000- Supervisor of child psychiatry fellows during nine-month School Consultation
rotation (five fellows per year)
Cambridge Health Alliance, Teen Health Center
Two hours per week

Formally Supervised Trainees

Selected List of Trainees and Junior Staff, not all-inclusive

- 1999-2004 Ayelet Barkai ,MD
Current: Staff/Faculty, CHA; Lecturer in Psychiatry, HMS; Child and Adolescent Psychiatrist in private practice, Cambridge, MA
Career stage: Early career child psychiatrist and first and second year child psychiatry fellow.
Mentoring role: individual supervisor involving weekly review of therapeutic progression of clinical cases, risk assessment and treatment planning. Writing for peer review coauthored manuscript, reviewed and co-presented regional day- long conference for educators.
Accomplishments: Co-authored article in *Adolescent Psychiatry*: “A Psychiatric Perspective on Narratives of Self-Reflection in Resilient Adolescents”
- 2004-2014 Nada Milosavljevic, MD
Current: Staff/Faculty, MGH; Clinical Instructor in Psychiatry, HMS; Founder and Director of the Integrative Health Program at MGH
Career stage: Child psychiatry fellow and early career child psychiatrist.
Mentoring role: individual supervisor involving weekly review of therapeutic progression of clinical cases, risk assessment and treatment planning. Writing for peer review co-authored manuscript, helped with mentoring of her work with Boston-area school clinics to provide alternative and complementary treatments for anxiety and stress conditions, coached her in early career as opportunities for Harvard CME presentations.
Accomplishments: Founder and Director of the Integrative Health Program at Massachusetts General Hospital (MGH); Coauthored article in *JAACAP*: “Case study: the internet as a developmental tool in an adolescent boy with psychosis.”
- 2006-2008 Margaret Benningfield, MD

Current: Child and Adolescent Psychiatrist and Assistant Professor, Departments of Psychiatry and Pediatrics, Vanderbilt University, Nashville, TN

Career stage: Child psychiatry fellow.

Mentoring role: Individual supervision for two years during child fellowship involving weekly review of therapeutic progression in schools and mentoring of her interest in school based consultation. Consulted regarding writing projects.

Accomplishments: Received NIDA-AACAP K12 Career Development award for project entitled “Neurobiology of Impulsivity, Risk Taking and Reward in Youth at Risk for Addiction”. Medical Director of Vanderbilt’s School-Based Mental Health Program. Elected to Vanderbilt’s Academy for Excellence in Education in 2016.

2007-

Deborah Kulick, MD

Current: Faculty, CHA; Instructor in Psychiatry, HMS; Medical Director for School-Based Programs in Psychiatry, CHA.

Career stage: child psychiatry fellow and early career child psychiatrist.

Mentoring role: individual supervisor for two years during child fellowship involving weekly review of therapeutic progression of clinical cases. Seven years of mentoring and supervision after fellowship with high-risk cases and consulting about safety assessments. Coauthored peer reviewed article about pediatric psychopharmacology. Supported developing presentation for HMS CME course for school mental health. Supervised regarding leadership role in Child psychiatry and school consultation in the child psychiatry department at CHA.

Accomplishments: Became Medical Director for School-Based Programs in Psychiatry at CHA. Co-authored article for *Psychology in the Schools*: “Psychotropic medications: An update for school psychologists.” Presented at Harvard School Mental Health CME Course, “What School Personnel Need to Know About Psychiatric Medications.” Co-authored chapter “Interfacing with the School System”.

2009-2010

Ruth Gerson, MD

Current: Director, Bellevue Hospital Children's Comprehensive Psychiatric Emergency Program; Clinical Assistant Professor, Department of Child and Adolescent Psychiatry, NYU School of Medicine

Career stage: Adult psychiatry resident.

Mentoring role: weekly seminar for Dr. Gerson third year, and early career coauthored articles with Dr. Gerson and collaborated on submissions to AACAP national conferences.

Accomplishments: Co-authored article in Adolescent Psychiatry: “Cyber Cruelty: Understanding and Preventing the New Bullying.” Co-chaired session and presented at American Academy of Child and Adolescent Psychiatry, “Cyber Cruelty: Understanding Cyberbullying and Its Consequences.” Co-authored article in Journal of Adolescent Health: “Traumatic Stress and Posttraumatic Stress Disorder in Youth: Recent Research Findings on Clinical Impact, Assessment, and Treatment.”

2008-2015

James Barrett, PhD

Current: Director of Clinical Support Services, Cambridge Police Department; Part-time Assistant Professor of Psychology, Harvard Medical School

Career stage: Staff Psychologist, CHA.

Mentoring role: supervised safety assessment evaluations, collaborated with police community intervention, mentored writing, coached in preparation for presentations at national conferences.

Accomplishments: Co-authored article in *Adolescent Psychiatry*: “Keeping it Real: Overcoming Resistance in Adolescent Males Mandated into Treatment”; Founder, Safety Net Police and Mental Health Collaboration. Co-Director of HMS School Mental Health Conference for two years.

2013-2015

Courtney McMickens, MD

Current: Child and Adolescent Psychiatrist, Novant Health

Career stage: First and second year child psychiatry fellow.

Mentoring role: individual supervisor for two years involving weekly review of therapeutic progression of clinical cases, risk assessment and treatment planning, second year elective working on qualitative research project on safety assessments.

Accomplishments: Co-authored and presented poster at Mysell Day. Co-authored chapter in *Child and Adolescent Psychiatric Clinics of North America* “Safety Assessment in Schools: Beyond Risk: The Role of Child Psychiatrists and Other Mental Health Professionals.” Co-presented at AACAP national meeting on safety assessments. Received Robert Wood Johnson Clinical Scholarship for 2015-2017. Co-authored article in *International Journal on Violence in Schools*.

2013-2015

Justine Wittenauer Welsh, MD

Current: Assistant Professor of Psychiatry and Behavioral Sciences, Emory School of Medicine, Atlanta, GA; Program Director, Emory Substance Abuse Treatment Services

Career stage: First and second year child psychiatry fellow.

Mentoring role: individual supervisor for two years involving weekly review of therapeutic progression of clinical cases, risk assessment and treatment planning, participated as teacher associate with my Harvard freshman seminar for second year of her fellowship, co-authored several articles together.

Accomplishments: Teaching Associate for my Harvard University Freshman Seminar: Frameworks for Understanding Psychological Development, Disorder and Treatment: Learning through Literature and Research. Co-authored articles for *Educational Leadership*: “Is this student safe at school? The Safety Assessment Model,” *JAACAP Connect*: “Risk Assessment of Students’ Online Behaviors: The Role of the Mental Health Consultant,” and *Classroom Management: An A-to-Z Guide*: “Adolescent Substance Use and Associated Problems.” Received Joint National Institute on Drug Abuse and American Academy of Child and Adolescent Psychiatry Research Award in 2014. Co-authored article in *Educational Leadership* and book chapter.

2018-

Meredith Gansner, MD

Current: Psychiatry resident.

Career stage: Second year psychiatry resident.

Mentoring role: Writing mentor.

Accomplishments: Co-authored article in *Educational Leadership*.

Formal Teaching of Peers (e.g., CME and other continuing education courses):

No presentations below were sponsored by outside entities

- 1997 Treating Adolescent Vulnerabilities. Adolescent Self-Harm Prevention and Treatment
Cambridge Hospital/Harvard Medical School CME Course
Moderator.
Boston, MA
- 2004 The Meaning of Medication to Children and Adolescents
Harvard Medical School CME Course entitled “Adolescent Self Destruction”
Single lecture.
Boston, MA
- 2005 Being a Danger to Self or Others: The importance of assessing safety in children and adolescents in schools and in the community, Treating Posttraumatic Stress Disorders in Adolescents
Harvard Medical School CME Course entitled “Adolescent Self Destruction”
Two lectures.
Boston, MA
- 2006 Strategies for Overcoming Impasses: Lessons in Humility and Humor
Harvard Medical School CME Course entitled “Treating Students K to 12: Clinicians and Educators Working Together”
Single lecture.
Boston, MA
- 2007 Course Director and Presenter, Controversies in Health: Finding our way.
Harvard Medical School CME Course entitled “Treating Students K to 12: Clinicians and Educators Working Together”
Single lecture.
Boston, MA
- 2008 Course Director and Presenter, Making Schools Safe: Understanding the Threat of Aggressive and Violent Behaviors
Harvard Medical School CME Course entitled “Treating Students K to 12: Clinicians and Educators Working Together”
Single lecture.
Boston, MA
- 2009 Course Director and Presenter, Dispensing Medication - Dispensing Controversies: Fact and Fiction on Child and Adolescent Psychopharmacology
Harvard Medical School CME Course entitled “Treating Students K to 12: Clinicians and Educators Working Together”
Single lecture.

Boston, MA

Report of Clinical Activities and Innovations

Current Licensure and Certification:

1988-present Massachusetts Medical License
1994-present Board Certified Adult Psychiatrist (recertified in 2013)
1996-present Board Certified Child and Adolescent Psychiatrist (recertified in 2013)

Practice Activities:

1993-2016 Psychiatry. Outpatient clinic
Teen Health Center, Cambridge Health Alliance

1997-present Psychiatry. Private practice
Cambridge, MA
Currently eight hours average per week.

2002-2016 Safety evaluations and psychiatric consultation.
Director of School Programs, Cambridge Health Alliance
Twenty hours per week.

2016- Psychiatric consultation and school consultation
Senior Consultant, Cambridge Health Alliance
Eight hours per week

Clinical Innovations:

Advising Program

Created a high school advising program in which teachers volunteer to meet weekly with groups of 12 students, going far beyond the traditional guidance program by strengthening relationships and providing knowledge to students about how to negotiate within the high school, linking them to extra curricular activities, helping them with course selection, time budget, and follow up with homework assignments. The creation of the program focuses on strengthening relationships by building a “home base” and examining the infrastructure necessary to sustain staff commitment to the program. The program has received local and national recognition, with many school systems asking for assistance in development of their own programs, and student evaluations show that they find it supportive and helpful in meeting their academic goals.

Safety Assessments

Developed a model for conducting safety assessments with adolescents who are aggressive in school, and many have experienced trauma or have an untreated psychiatric disorder. The assessment includes in-person interviews with teachers and administrators and home visits when appropriate, and results in active coordination for access to needed services and education to families about clinical options. I have presented this model at professional conferences, to school systems, and have trained many child psychiatrists and educators to perform these assessments.

Report of Teaching and Education Innovations

“Frameworks for Understanding Child and Adolescent Development” Curriculum for Adult Psychiatry Residents

Developed and taught a year-long course on normal and abnormal child development for adult psychiatry residents. The curriculum was selected as a model curriculum in 2013 by the American Association of Directors of Psychiatric Residency Training. The curriculum, refined over eight years, brings together dynamic lecturers and pertinent readings to provide the residents with both a conceptual overview of development and specific information and strategies they need to improve their practice with adults and families. The course exposes adult residents to critical information including how to assess family functioning, strengths, and vulnerabilities, normal and atypical child development, diagnostic formulation in children and adolescents, and differential diagnosis and assessment of suicidality in children and adolescents.

School Consultation Rotation Program

Developed a ten-month school consultation rotation for child psychiatry fellows to teach them the necessary skills to provide assessments and consultations in schools. Skills for special education advocacy and school consultation are taught through a case-based model and review of assessments. The fellows are trained in how to communicate effectively with educators and provide professional development that enhances teachers’ efficacy with students. This rotation has been referred to as a “cutting-edge paradigm shift,” as child psychiatry programs generally provide little guidance in school consultation.

Harvard Freshman Seminar: “Finding Connections: Perspectives on Psychological Development and Mental Illness”

The innovative Freshman Seminar program for Harvard undergraduates exposes first year students to a unique learning experience through close interaction with senior faculty. This small group freshman seminar introduces students to a number of topics relating to psychological and mental illness early in their college careers. The seminar combines medical readings that provide practical knowledge, narrative readings to understand how patients experience the meaning of illness and how development-related mental illness is portrayed in the press, and discussions with visiting speakers who are living with mental illness. Understanding how conditions such as autism, depression, and loss are described in both clinical research and literature helps students appreciate the biological vulnerabilities and relational patterns that may disrupt human connections. Freshmen facilitate and create final projects as varied as research projects, dance performances, and creative essays.

The Behavior Code

The Behavior Code bridges the worlds of education and mental health, addressing a gap in teacher training and providing critical tools to enhance teacher effectiveness in meeting the needs of challenging students. The book *The Behavior Code: A Practical Guide to Understanding and Teaching the Most Challenging Students* distills the combined clinical and practical experience of Dr. Rappaport and behavioral specialist Jessica Minahan to enhance educators’ understanding of the underlying psychiatric difficulties related to students’ challenging behavior and to generate practical tips and concrete strategies to help turn a classroom around. Laying out a new

framework for working with challenging students, the book uses case examples of students with oppositional, depressed, anxious or provocative behavior. Dr. Rappaport and Ms. Minahan have presented to thousands of educators around the country and abroad since the publication of the book to further disseminate this framework for working with students. Ms. Minahan published a follow-up book, *The Behavior Code Companion: Strategies, Tools, and Interventions for Supporting Students with Anxiety-Related or Oppositional Behaviors*, which provides additional guidance for teachers to understand and practice the components of this innovative framework.

Practice parameters adapted by AACAP for use by child psychiatrists consulting to schools consistent with the best available scientific evidence and clinical consensus. I contributed to the initial drafts of the manuscript as a member of the AACAP Work Group on Schools.

Narrative Report

As a child psychiatrist and former elementary school teacher in Harlem, I have had the good fortune to develop programs to work actively in schools and school-based health centers. For the past 23 years, I have worked directly with the Cambridge public schools, providing consultation that helps improve the lives of children who often have broken families, mental anguish, and limited access to resources. Previous generations of child psychiatrists evaluated school referrals in their private offices and then provided written reports, without ever observing the school environment or considering how the school culture could be contributing to the students’ challenges. I bridged that gap as one of the first of a growing number of peers who provide critical support to students on site in the school to ensure progress. This change in direction represents a paradigm shift, and I have encouraged schools to intensify targeted mental health services to support struggling students with substantial emotional challenges.

My work as a consultant to Cambridge public school administrators and as a treating child psychiatrist has led to a national discussion about the obstacles schools face in terms of resources, school culture, and adequate supervision. As the consulting child psychiatrist at

Cambridge Rindge and Latin School, I began work in a community in which many adolescents skipped class, failed courses, and had a high rate of suspensions. Recognizing this repetitive cycle, I thought schools needed a way to fortify students' ties with educators and increase the opportunity for students to become more self-reflective and play a more productive role in their education so I created an advising program. I supervised teachers, coauthored a curriculum, and integrated student and faculty feedback to enhance the program. While this curriculum was successful locally, I wanted people to develop this nationally and I was grateful that schools have frequently asked me to share my insights so that they could adopt positive solutions in their communities.

Immediately after the Columbine massacre when the threat of school violence became a major public concern, I began to develop a safety assessment protocol that expands the child psychiatry role to address school violence by intervening early with students who display aggressive behavior and/or may pose a threat to other students and teachers. My approach emphasizes an understanding of the context of the identified student's behavior by conducting a psychiatric interview with the referred student, a separate interview with the family, and interviews with school personnel and involved mental health clinicians. By providing a sophisticated formulation that is case-based, this process generates multiple points of intervention.

I have trained new generations of child psychiatrists in this approach and presented nationally and written extensively to provide a rationale and framework for schools to be more responsive to the risks and vulnerabilities of these students. In a pilot study of the model, I found that nearly all of these aggressive students had serious underlying psychiatric illness such as post traumatic stress disorder, attention deficit disorder or bipolar disorder, and most were not receiving help and needed assistance with coordinating mental health services. I was thrilled to have this work and advocacy recognized in 2011 with the American Academy of Child and Adolescent Psychiatry's Sidney Berman Award for the School-Based Study and Treatment of Learning Disorders and Mental Illness.

My experiences developing this program helped me identify a clear lack in the research focusing on the perspectives of students and their families who have been identified by schools as potential safety threats. To address this gap, I recently conducted a first-of-its-kind qualitative study that explored students' and families' experiences of school safety assessments, as well as the events leading up to the assessment. The study was recently published in the *International Journal of Violence in Schools*. The study also acted a catalyst for building on the work I have done to teach school personnel about safety assessment to design a new type of course for school district teams, rather than individuals, that focuses on how to strengthen district safety assessment protocols through a broader look at discipline and internet policies, guardian engagement, school climate, and relationships with law enforcement and other community resources. The first course with Boston-area schools in 2018-19 was a success.

Through many years of consulting to educators and clinicians I realized how it takes a special skill to translate psychiatric concepts in useful ways for educators. I collaborated with Jessica Minahan, a behavioral analyst and special educator, to write "The Behavior Code: A Practical Guide To Understanding and Teaching the Most Challenging Students." Educators often struggle with how to connect and respond to students with the most challenging behavior because traditional classroom management strategies fail. This book is a fundamental resource to help teachers and other support staff understand underlying psychiatric symptoms of students with

anxiety-related, oppositional, withdrawn, or sexualized behaviors. Using illustrative case examples, we combined behavioral and clinical approaches in a four-step process to generate more informed selection of practical accommodations and intervention strategies to reinforce positive behaviors and build students' skills. The book has become a valuable resource for school psychologists and educators nationwide, and it is a best seller for Harvard Education Press.

As a dedicated teacher myself, I have mobilized a new generation of child psychiatrists to collaborate with educators and to advocate for their patients to optimize their functioning in school. I developed a ten-month school consultation rotation for the child fellows to teach them the necessary skills to provide assessments and consultations in schools. For ten years, I developed and taught a yearlong course on normal and abnormal child development, which was selected as a model curriculum in 2013 by the American Association of Directors of Psychiatric Residency Training. For the last ten years I have taught the popular Harvard freshman seminar, "Finding Connections: Perspectives on Psychological Development and Mental Illness." I mentor my students and expose them to research and clinical applications. I am also the course director for an annual HMS program "Treating Students K to 12: Clinicians and Educators," which provides training opportunities to educators from across the country.

I undertook the challenge of writing a memoir, *In Her Wake: A Child Psychiatrist Explores the Mystery of Her Mother's Suicide* that synthesizes my personal experience and clinical research. I illuminated the complex causes of suicide and exploring the lingering effects of family trauma while also conveying the process of healing. I offered this book to teach about prevention of suicide and to reach those who may be contemplating suicide to recognize the devastating loss on their families. Since its publication, I have made numerous presentations to professionals and to the public with outreach via print, radio, blogs, webinars, and television appearances to educate a broad audience about mental illness, how to provide support to a person who is suicidal, and how to understand children who have experienced loss by suicide. I contributed to writing guidelines for parents for the American Foundation of Suicide Prevention about how to approach children after a suicide.

In 2015, I wrote a one-woman play, *Regeneration*, about navigating illness while being confronted with mortality. In performing this play for medical providers, my goal is to help them see how their own vulnerabilities can nurture their capacity for empathy and motivate them to provide the small acts of kindness that mean so much to their patients and give them the strength to cope with a serious health challenge. In performances for lay audiences, I hope to inspire them to use creativity as a way to overcome challenges. By creating a narrative of a challenge, we make meaning of the event and maintain the vital connections that sustain us.

My day-to-day goal is to advocate for comprehensive support with our most vulnerable children, who often require child psychiatrists to mobilize in a way that is different from the traditional model. As an educator, I teach this message of support to the students in my freshmen seminar at Harvard as well as to my residents. My passion as a teacher and clinician is to better the lives of the young people I treat and to pass my knowledge on to the future practitioners who will carry on the work I pioneered.
